Genuine Brother Supplies

Why choose Genuine Brother Supplies?

Genuine Brother ink is the result of extensive research & development of over 100 different elements. Using non-Brother supplies may affect hardware performance, copy quality and machine reliability. When combined with the right quantity and configuration, components of the 4-cartridge colour ink system, these elements ensure reliable operation & protection of the machine and long-life print head.

Super High Yield Cartridges

Using super high yield ink cartridges is economical as it contains four times the black ink and double the ink in Brother's colour cartridges, therefore reducing cost per page.

All Brother Ink Cartridges are available to buy as part of a multipack. Packs include Twin Black, Rainbow (Cyan, Magenta and Yellow) and Value (Cyan, Magenta, Yellow and Black). This is more economical and reduces cost per page.

Brother Paper

To achieve the highest print quality, choosing the right paper is also important. Brother ink and paper have been specially created for optimum performance and when used in combination the prints will last over 100 years without fading. With inkjet printers we recommend using Brother BP71 Premium Plus photo paper. The Innobella glossy paper has been given a special coating and when used in conjunction with Innobella inks there is less ink bleed.

Brother also offers a wide range of paper types including plain or matte in a range of sizes, which can be used with inkjet, mono and colour laser printers. Brother paper guarantees sharp, well defined images print after print.
